

## **ABLOY® EL480 AND EL482** NEW SCANDINAVIAN RANGE SOLENOID LOCKS WITH HANDLE CONTROL

**ABLOY®** EL480 and EL482 are recommended to be used in interior or exterior doors of business premises, public buildings, hospitals, educational premises etc., and the exterior doors of apartment buildings and detached houses. Handle controlled locks are best suited in medium traffic doors. The locks can be used in both exit and fire rated doors (EN). They are not suitable to be used with door automatics. The locks can be electrically controlled by a variety of access control systems or remote control equipment such as push button, keypad or timer.

**ABLOY®** EL480 is especially suited for use in exit doors, as the inside handle is free for egress at all times.
